

Nagomi Inc.'s Mission and Philosophy

Nagomi Ya is the first Japanese-culture oriented assisted living facility opened in Minnesota. Since we opened in 2007, we've been serving seniors sincerely. Now we accept up to nine residents.

Nagomi Inc.'s philosophy is to respect and support heritage and culture of all of our residents, assure the quality of care, and provide Japanese-culture oriented living style and foods for residents. Nagomi Inc. is licensed as an Assisted Living Facility with the Minnesota Department of Health. We provide following services for seniors who are age of 55 and up: Food, lodging, 24-hour supervision, protection and household services. We will also assist with medication and personal care depending on individual situations.

Other than the services listed above, we will provide Japanese TV program, and also Japanese DVDs and books we can borrow from Japanese library.

Services

We will provide following services as required in DHS (Minnesota Department of Human Services).

Food: We provide three nutritious meals and two snacks per day. If a resident need a special diet ordered from physician or dietician, we will provide meals as indicated.

Lodging: Each room has one to three beds. We provide bed, dresser, built-in closet and a mirror unless residents prefer to use their own properties. Residents have access to living room and dining room.

Supervision & protection: During daytime, two or more staffs are staying on site; one staff supervises up to five residents. During nighttime, staff are allowed to take a nap but available 24-hours. All staffs are required to receive orientation about abuse and neglect through compliance with the Vulnerable Adult Act and physical training for certain hours. Supervising residents minimizes risk of falls and keep them away from hazardous substances. The level of care is determined yearly and as needed by care-team including resident and family members.

Household services: Linen changes and laundry are done once a week and as needed. House cleanings are done daily basis.

Medication: Medications are set and stored centrally by RN. Director of nursing is in charge of medication supplies. Staff members are trained by director of nursing to handle and give medications as physicians ordered. RN is available on-call and weekly basis supervisory visits.

Personal Care: We will assist personal care such as dressing, grooming, bathing and toileting based on the resident's needs.

Funding

There are two options for funding source in order to manage lodging and human services: private pay and MA (medical assistance). In order to be qualified for MA, there is some health and financial conditions needs to be met.

There is also an option to start with private pay and switch to MA according to financial changes.
